Introduction

New MARCO collection

MARCO is the new contemporary metal collection by FEDE. Based on the purest concept of a switch frame, it includes modern finishes with a velvety feel.
You'll understand what we mean when you may have MARCO in your hands: it's as smooth as silk. Enjoy our new and incredibly touchable design.
The latest TREND, with an elegance that's both modern and classic. This is a NEW FRENCHIFIED and TRANSITIONAL STYLE, which allows for a wide-range of decoration possibilities, all the while fitting perfectly in white, black, moka, green olive or red wine.
We invite you to combine our new frames with all of FEDE's electrical mechanisms. You'll discover intriguing innovations that complement our extensive range, like dimmers and toggle switches, both metal and with a FACTORY touch, created for LOFT-type spaces.
Think metal and choose MARCO, the ideal collection to change the switches in your home. You will be simply amazed...

Nouvelle collection MARCO

MARCO est la nouvelle collection métallique et totalement contemporaine créée par FEDE. Basée sur un concept épuré d'interrupteur aux finitions très modernes et au touché de velours. Vous comprendrez ce que nous disons lorsque vous tiendrez la plaque décorative MARCO entre vos mains: lisse comme de la soie. Une sensation incroyable pour profiter au maximum de notre nouvelle conception. La dernière TENDANCE, si moderne mais tout aussi classique à la fois pour son élégance. Nous vous parlons d'un NOUVEAU STYLE FRANÇAIS et TRANSITIONNEL qui nous inspire et qui s'intègre parfaitement avec la decoration… En Blanc, noir, moka, olivier ou bordeaux.
Nous vous invitons à combiner nos nouvelles plaques décoratives MARCO avec l'appareillage électrique de FEDE. Vous découvrirez de nouveaux développements très intéressants qui complètent notre large gamme tels que le régulateur de lumière et l'interrupteur à bascule, les deux métalliques, avec une inspiration FACTORY, ils ont été conçus pour des espaces de type LOFT. Métallisez-vous et choisissez MARCO, c'est tout simplement la collection idéale pour changer les interrupteurs de votre maison. Vous en serez surpris…

Nuova collezione MARCO

MARCO è la nuova collezione metallica e totalmente contemporanea creata da FEDE. Basata sul concetto di covers dalle finiture ultramoderne e da una morbida sensazione al tatto.
Ne comprenderete il significato solo quando terrete un interruttore MARCO nelle vostre mani: morbido come seta. Una sensazione incredibile che vi permetterà di godere appieno della nostra nuova creazione. La ultima TENDENZA, moderna e al tempo stesso classica grazie alla sua eleganza.
Stiamo parlando di un NUOVO STILE FRANCESIZZATO E TRANSIZIONALE che lascia molto spazio decorativo.. in bianco, nero, caffé, verde oliva e rosso vino. Ti invitiamo a combinare i nuovi MARCO con tutti i diversi meccanismi elettrici FEDE. Scoprirai novità molto interessanti che completano la nostra vasta gamma, come ad esempio i regolatori di luce e l'interruttore a levetta, entrambi metallici, con un tocco di FACTORY, creati per spazi tipo LOFT. Scegli MARCO, la collezione ideale per cambiare gli interruttori di casa tua. Ti sorprenderà...

Nueva colección MARCO

MARCO es la nueva colección metálica totalmente contemporánea creada por FEDE. Basada en el concepto más puro de un MARCO de interruptor con acabados muy actuales y de tacto aterciopelado.
Comprenderás lo que decimos cuando tengas el MARCO en tus manos: es suave como la seda. Una sensación increíble para que disfrutes al máximo de nuestro nuevo diseño.
La última TENDENCIA, moderna sí, pero a la vez clásica por su elegancia. Estamos hablando de un NUEVO ESTILO AFRANCESADO y TRANSICIONAL que nos da mucho juego decorativo y encaja perfectamente en blanco, negro, moka, verde oliva o burdeos.
Te invitamos a combinar los nuevos MARCOS con todos los mecanismos eléctricos de FEDE. Descubrirás novedades muy interesantes que complementan nuestra extensa gama como el regulador de luz y el interruptor de palanca, ambos metálicos, con un toque FACTORY, creados para espacios tipo LOFT.
Metalízate y elige MARCO, es simplemente la colección ideal para cambiar los interruptores de tu casa. Te sorprenderá…

Neue MARCO kollektion

MARCO ist die neue metallische Kollektion vollkommen zeitgenössisch von Fede entworfen. Sie basiert auf dem reinsten Konzept eines Schalterrahmen MARCO (Rahmen) mit sehr aktuellen Oberflächen und einem sanften Touch. Sie werden verstehen, was wir meinen, wenn Sie MARCO in Ihren Händen halten: es ist seideweich. Ein unglaubliches Gefühl, wobei Sie das Maximum unseres neuen Designs genießen.Die letzte TENDENZ, schon modern, aber gleichzeitig auch klassisch durch seine Eleganz. Wir sprechen von einem NEUEN ÜBERGANGS-STIL mit FRANZÖSISCHEM HAUCH, der uns viel Spielraum zum Dekorieren gibt, und ausserst gut zu Weiß, Schwarz, Olivgrün, Weinrot oder Mokka passt. Wir laden Sie ein, den neuen MARCO mit allen elektrischen Mechanismen von FEDE zu kombinieren. Sie werden sehr interessante Neuheiten entdecken, die unsere umfangreiche Auswahl ergänzen. Wie z.B. die Dimmer und Schalthebel, beide metallisch, und mit einem FACTORY-Touch, sind wie geschaffen für Räume wie LOFTS. Metallisieren Sie sich und wählen Sie MARCO, es ist die ideale Kollektion, um Ihre Lichtschalter zuhause aufzufrischen. Sie werden begeistert sein …

MARCO
COLLECTION

TWO DIFFERENT FRAME SIZES

For a total contemporaneous decoration we have designed two sizes that will fit perfectly in your Home Interior.
Which is your choice:
Rectangular or Square?

RECTANGULAR
110 x 85 mm

SQUARE
85 x 85 mm

MARCO
COLLECTION

SOFT TOUCH

The exclusive **SOFT TOUCH**
by **FEDE**.
How metal could be that
smooth?
Discover **MARCO** collection

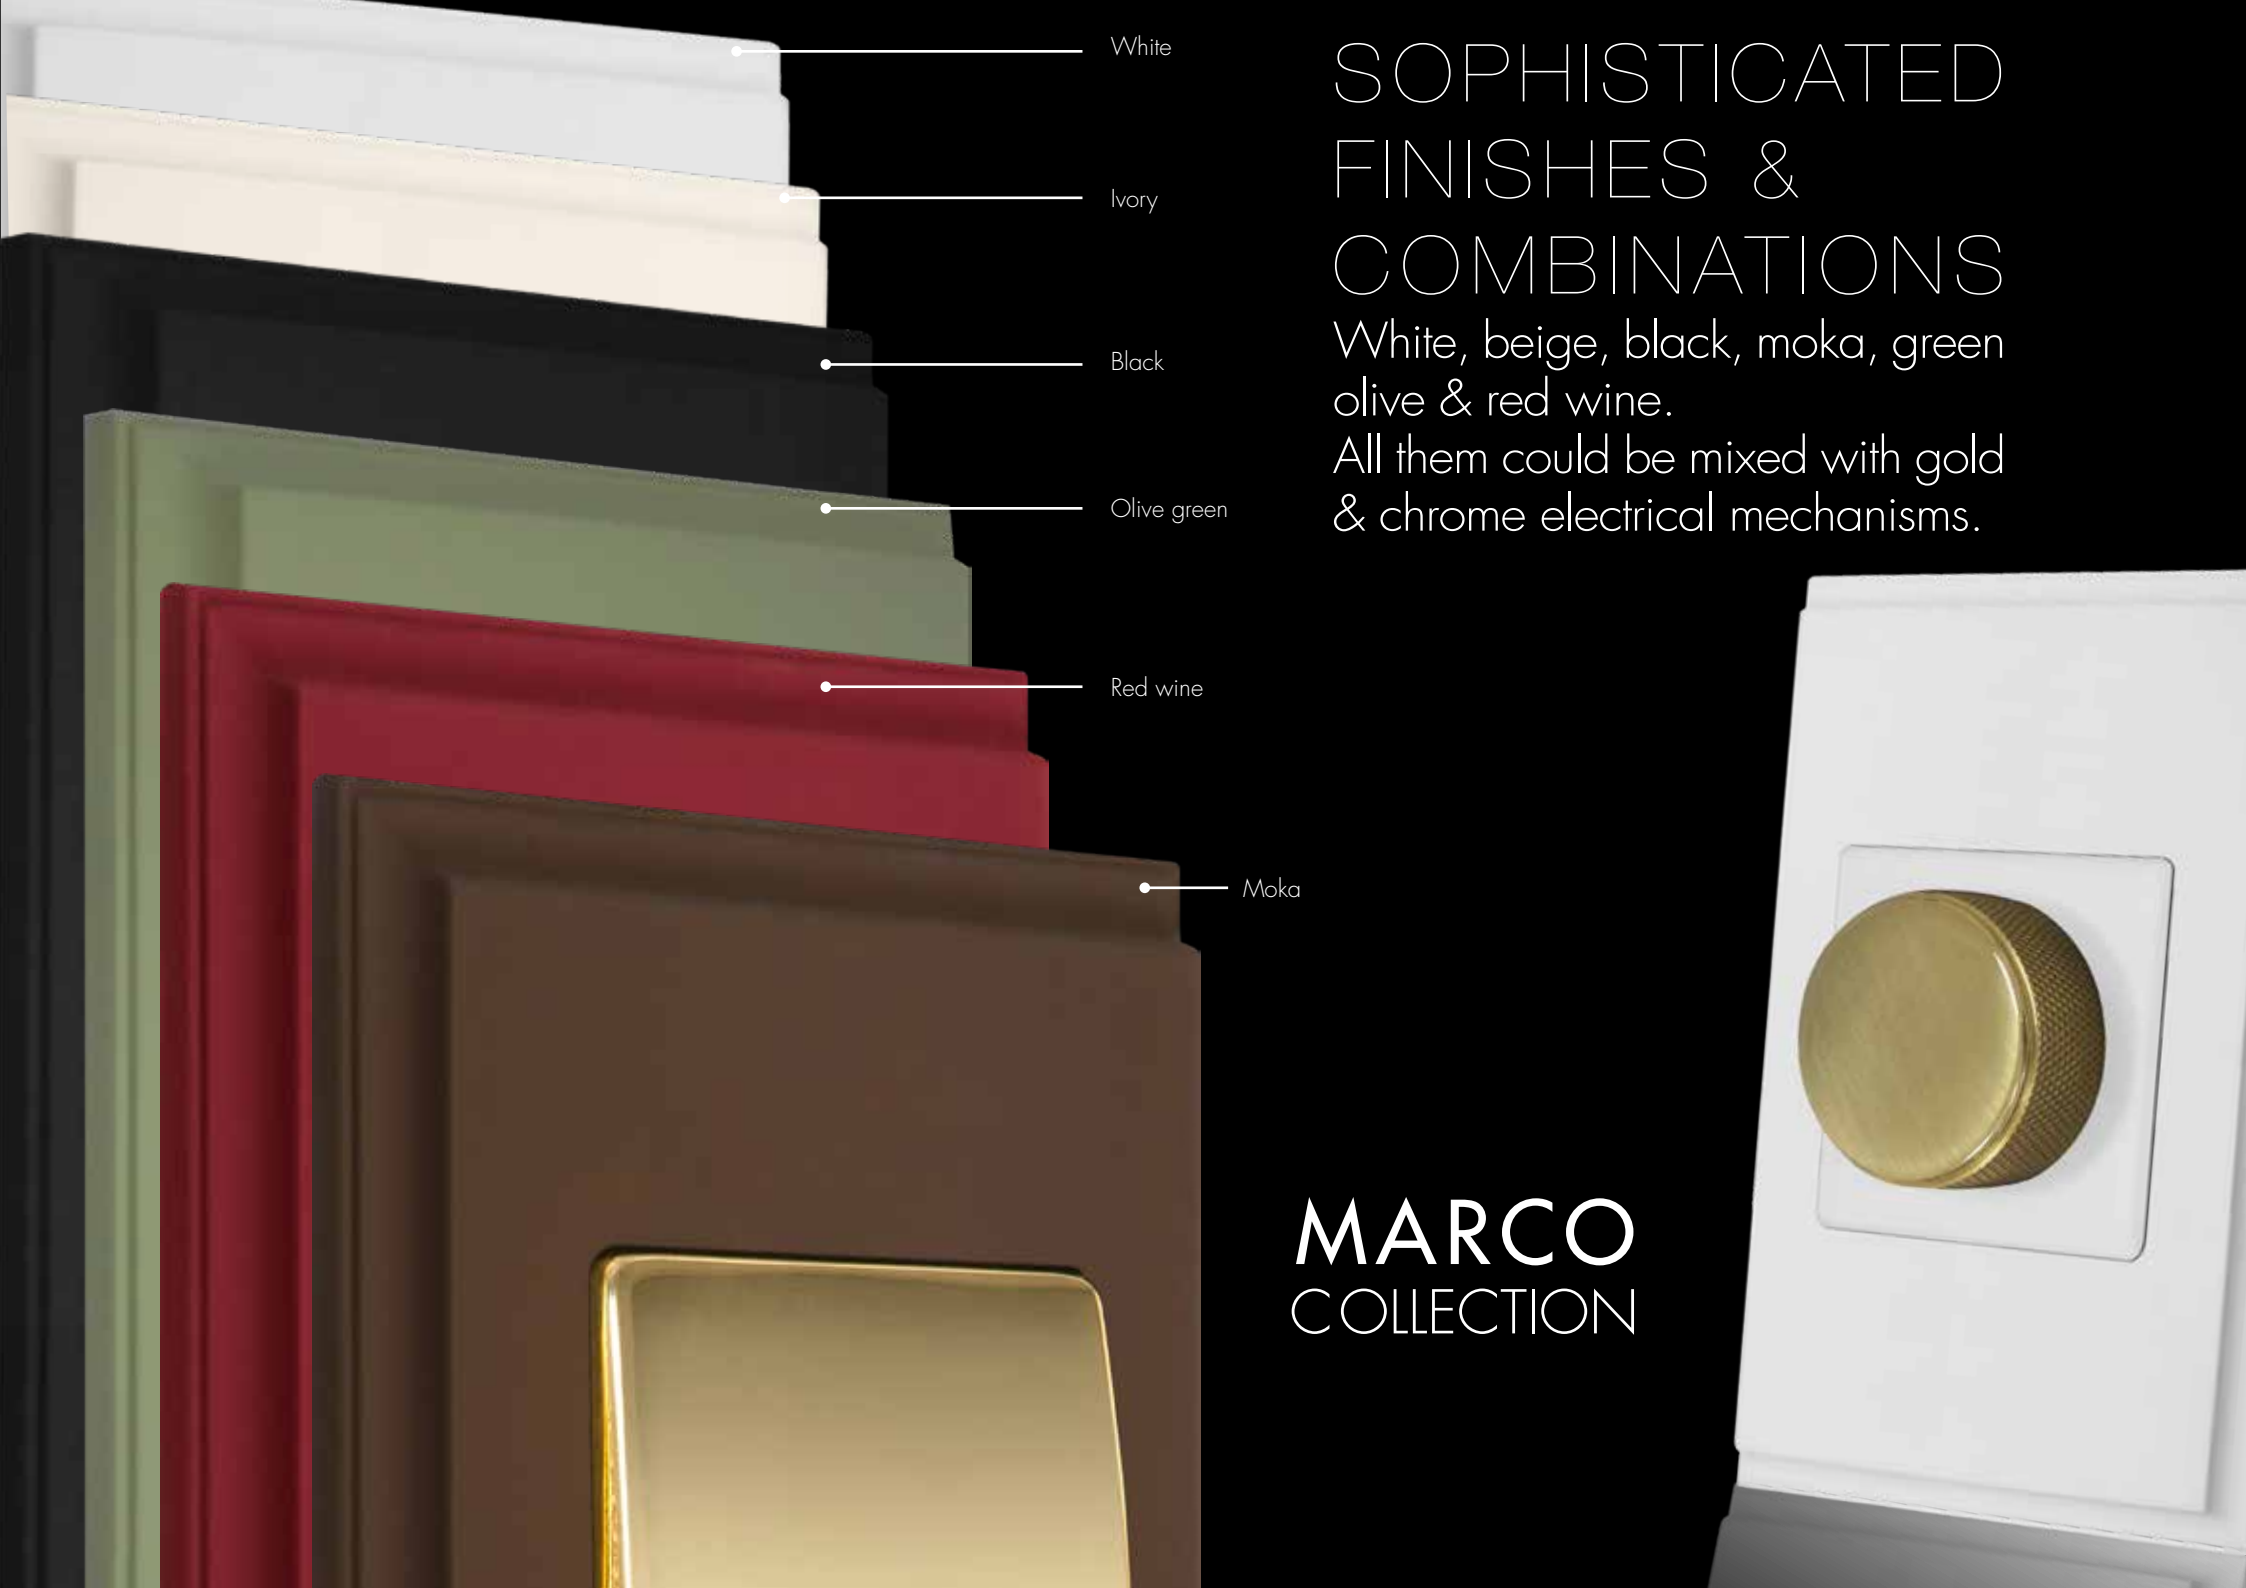
THE LATEST TREND

With an elegance that's both modern and classic.
A FACTORY touch, created for loft-type spaces.

STATE-OF-THE-ART ELECTRICAL MECHANISMS

Like our new dimmer and toogle switches, both METAL.

MARCO
COLLECTION

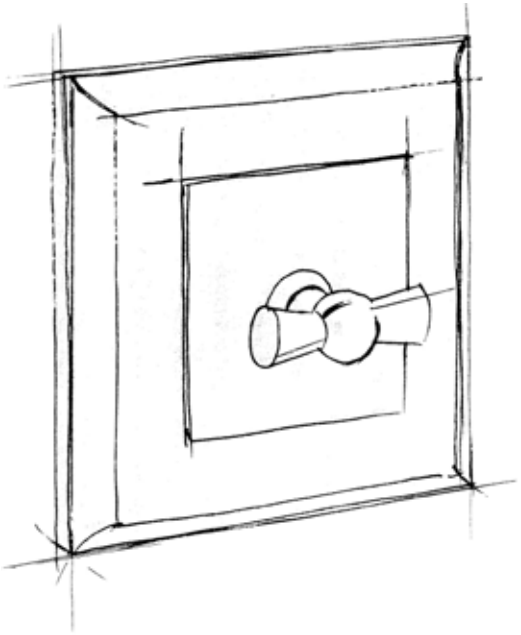


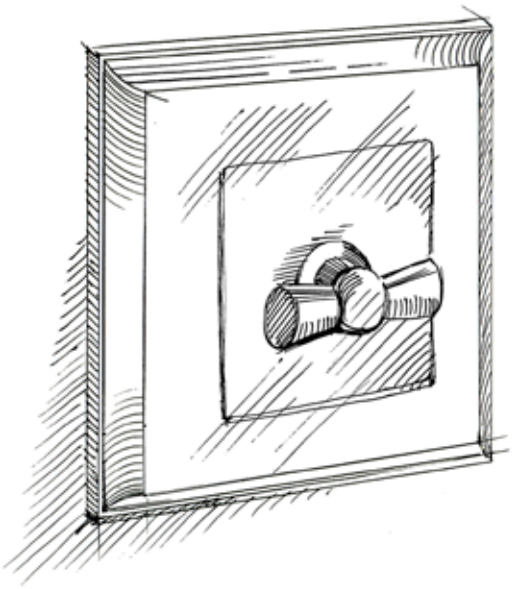
SOPHISTICATED FINISHES & COMBINATIONS

White, beige, black, moka, green olive & red wine.
All them could be mixed with gold & chrome electrical mechanisms.

MARCO
COLLECTION

Design, Evolution & Revolution





FROM CLASSIC TO MODERN!

How is it possible?
FEDE is the
SWITCH & LIGHT
tailor, creating
timeless styles
that will last forever.

MARCO
COLLECTION

*ITEMS' REAL SIZE ARE SHOWN IN THE IMAGES

REAL SHAPE & ALL IN METAL!

What do you prefer for your project?

1- Press switch with METAL key and frame.

2- METAL toogle switch with METAL frame.

3- METAL rotary switch with METAL frame.

4- METAL rotary dimmer with METAL frame.

SLIM & CLASSY!

Maximum Flexibility

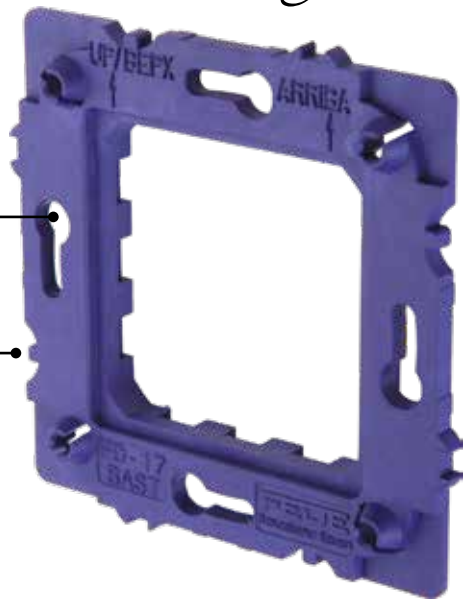
The same switch mechanisms are used in both toggle switches and switches with keys. Thanks to our system's versatility, you can always easily change the design of already installed switches without performing complicated electrical work for their assembly.

For two-key switches, both mechanisms are installed in the fixing support. Different types of switch mechanisms can be combined, such as a simple switch and a two-way switch.

For single key switches, the mechanism is installed in the central part of the fixing support.

Modular System

The modular structure of the MARCO collection guarantees a maximum flexibility when being installed. Our wide range of electronic mechanisms allows for an optimal technical solution.



The holes allow for the mounting supports (brackets) to be aligned.

The notches on the edges allow the mounting supports (brackets) to be easily connected.

Most items, with the exception of complex electronic devices, are supplied disassembled without keys or front plates, i. e., any decisions regarding appearance can be taken during the project's final stage.

All system elements are connected through a clip system to ensure easy installation.

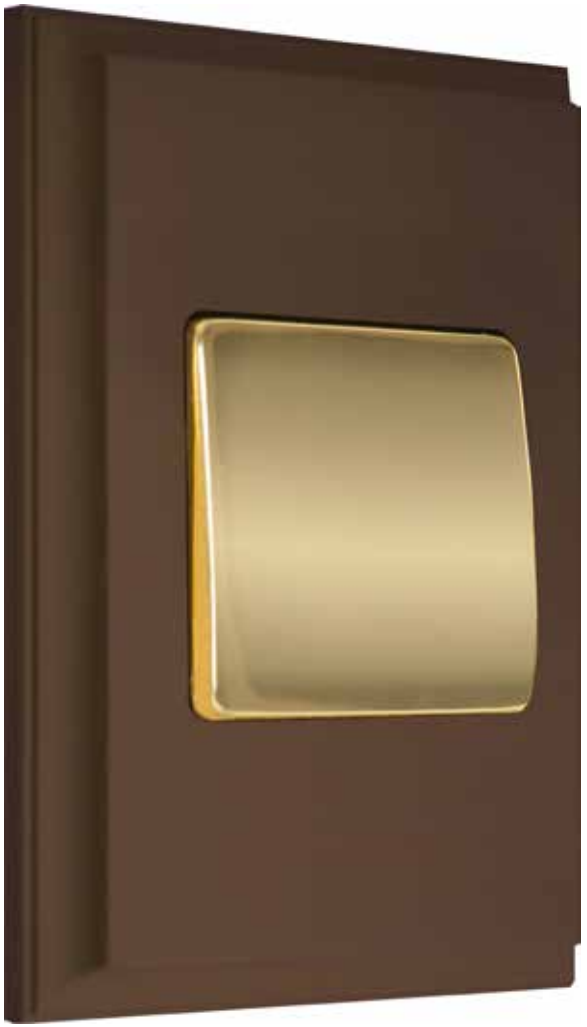
MARCO
COLLECTION

A MODULAR & UNIVERSAL SYSTEM

MAXIMUM VERSATILITY

In the Marco collection, we offer a wide range of decorative frames with the possibility to install up to five mechanisms.

Our decorative frames are universal and may be installed in both horizontal and vertical positions.



Switch with Brass Keys

For those who appreciate the real touch of metal, we have designed keys in real brass with a high-quality electroplated surface.

The combination of the shine of the brass surface and the matte finish of the decorative frames results in true elegance and sophistication.

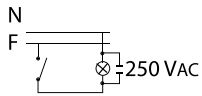
ADDITIONAL RESISTANCE / RÉSISTANCE SUPPLÉMENTAIRE / RESISTENCIA ADICIONAL

FD3139
Tensión: Máx. 250V
500 NF
Resistencia: 1MΩ



When using a switch with LED, the additional resistance stops LED lights from flickering when switched off, while saving energy. The additional resistance installed eliminates the capacitator's leakage currents that cause lights to flicker when the power is switched off.

Permite eliminar el parpadeo de las lámparas LED con un ahorro de energía en estado apagado, al utilizar un interruptor con iluminación. La resistencia adicional instalada en la cadena elimina las corrientes de fuga que cargan el condensador y llevan al parpadeo de las lámparas después de apagar la alimentación eléctrica.

Permet d´eliminer le clignotement des lampes LED pour une économie d´energie. En mise sous tension, lous de l´utilisation d´un interrupteur d´eclaviage. La ressistance supplimentaire installé dans la chaîne élimine les courants de fuite que produit le condensateur et qui conduit au clignotement des lampes une fois la mise hors tension de l´alimentation électrique.

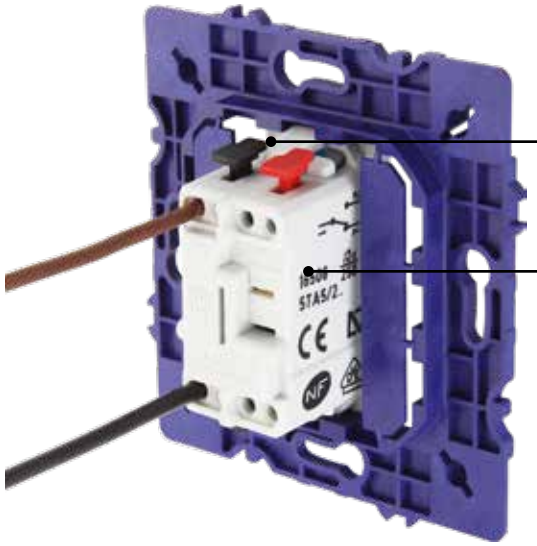
Universal Switches



Switches are equipped with screwless terminals for easy connection.

Our easy-to-read descriptions and connection diagrams are found in the switch housings.

The LED light can be installed in the mechanism with a simple click.

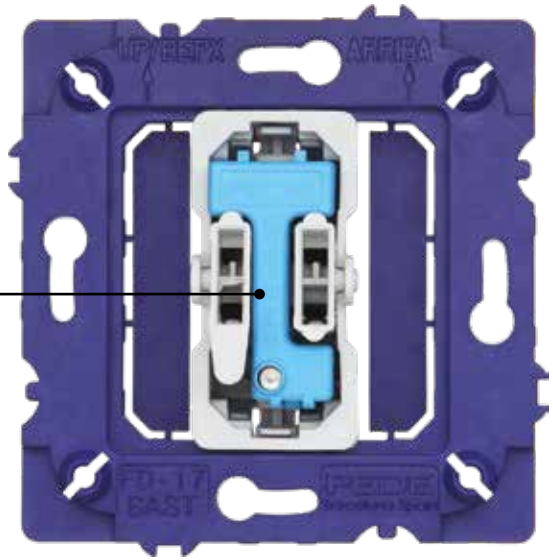
The same type of mechanism is used for lighted and non-lighted switches.

LED lights are installed in the switch mechanism by applying slight pressure, connecting automatically.

If necessary, you can change your common switch into a lighted switch. To do this, simply install the LED light and replace the opaque key with the diffuser key.

Switch mechanisms are available in two options: 10 and 16 A.

10A & 16A



State-of-the-art LED lights with a longer service life are used in our switches mechanisms.

High quality polyamide mounting support with fiberglass.

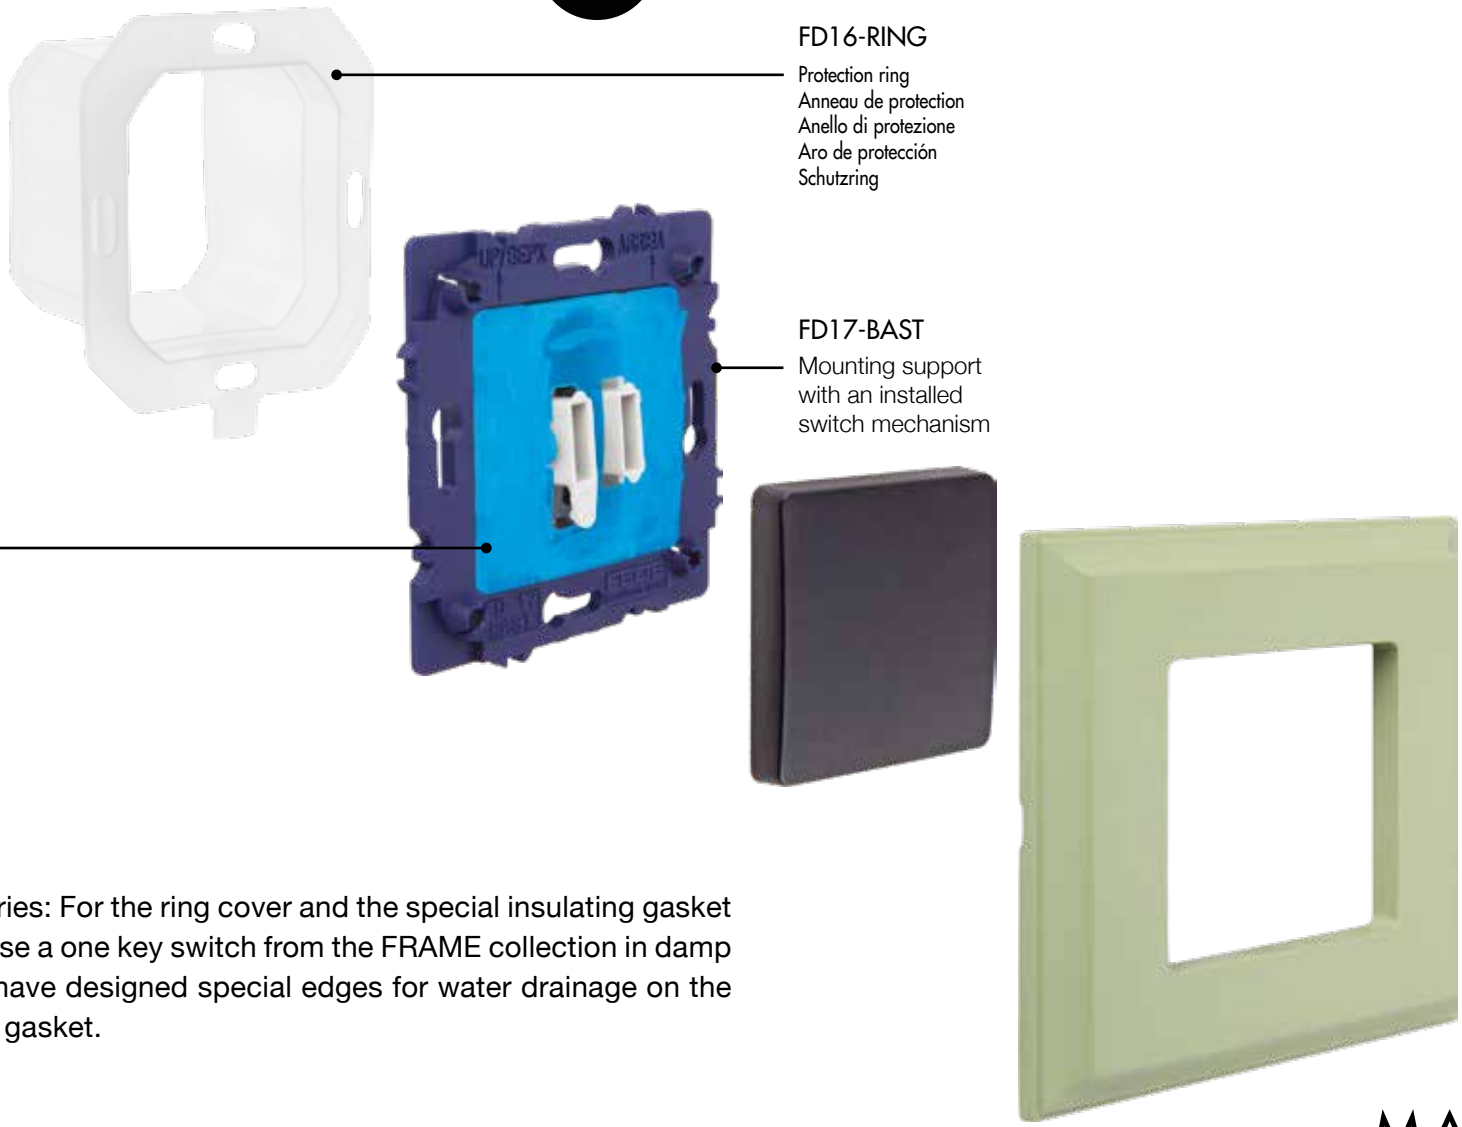
Arrows with the corresponding inscriptions for the correct positioning of the mounting support (bracket).

All anti-static parts of the mechanism are well protected.

The plastic covered metal keys provide excellent insulation of the surface when connecting the switch mechanism, offering maximum safety.

Devices are protected against humidity

IP44



When installing accessories: For the ring cover and the special insulating gasket below the key, you can use a one key switch from the FRAME collection in damp areas with an IP44. We have designed special edges for water drainage on the surface of the insulating gasket.

New Led Toggle Switch

And finally, we present the latest trend that is to turn on a light with a switch that incorporates a transparent toggle illuminated by LED.

How do we do it? Using the same standard switch mechanism. In this way, there is no need to make any additional changes to your project.

It’s just great! A detail that does not go unnoticed.

Toggle Switch

All retro style fans, love toggle switches.

Our new toggle switches incorporate an innovative design and the latest technology to become objects of desire.

We have created the “it-switch”. This invention of our FEDE + designers is incredibly MODERN & SOPHISTICATED!

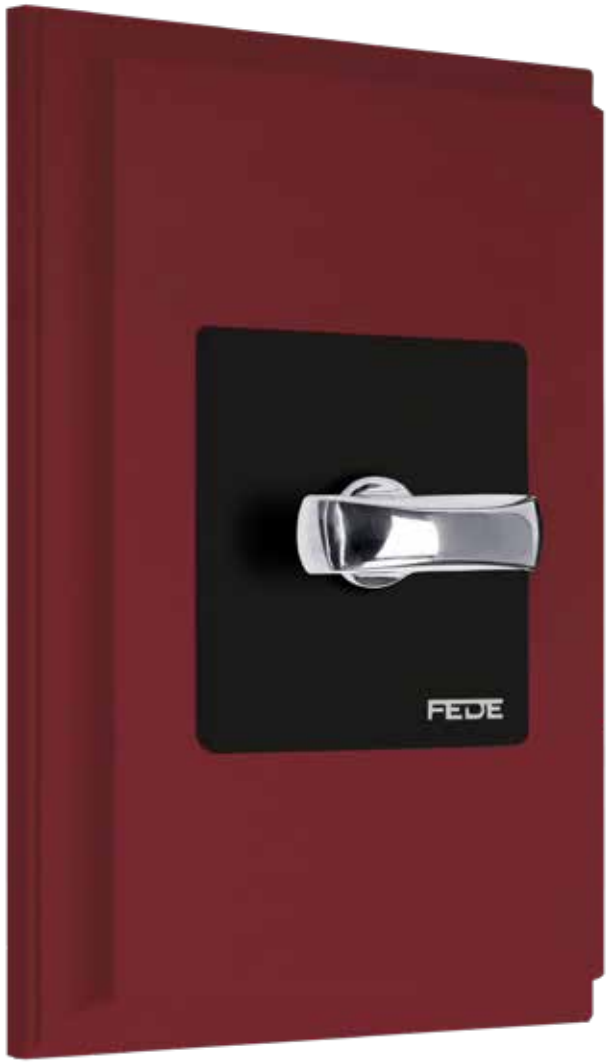
MARCO
COLLECTION



Rotary Switch

Rotary switches are a true embellishment from the collection, combining high switching capacity with a compact size.

The wide range of mechanisms with different connection schemes gives you the possibility to develop any kind of electrical project.

Rotary Switch

Central embellishment in two varieties: metal or plastic.

The handles are made of high quality cast brass.

Switches with auxiliary lighting are equipped with state-of-the-art LED lights.

Our mechanisms occupy as little space as possible in the installation boxes. That way we can free up space for connections and facilitate installation. FEDE+ rotary switches are the most compact and powerful in the market.

10A & 25A

The compact size does not affect power, as FEDE + switches have very high switching capacity, with two switch options for 10A and 25A.

Infrared Light Switch

Replacing a regular wall switch, this unit automatically turns lights on when someone enters in a room. It increases energy savings by automatically turning lights off after only momentary occupancy. An integrated Light-Dependent-Resistor prevents lights from turning on when the room has adequate natural light. The combination of PIR and light-level detection technology provide excellent lighting control reliability. The slide-selector provided for conveniently switching light on/off manually or to enable PIR/CDS to operate automatically.

Multiple Function Controller

This controller integrates multiple functions in one unit. It is designed as a replacement for the bathroom fan and light switch, and uses a microprocessor to control the fan delay-off operation. The Delay Timer function allows the fan to continue operating to complete the ventilation of the bathroom after use.

*To change plastic rotary handle for brass rotary handle, you just need to replace the plastic one and put another type from brass. Plastic handle is included with dimmer mechanism.
*Pour changer les poignées rotatives en plastique en poignée rotative en laiton, vous avez juste à remplacer celle en plastique pour celle en laiton. La poignée en plastique est inclue avec le mécanisme du variateur.
*Per sostituire le manopole in plastica con quelle in ottone, è sufficiente sostituire la plastica per l'ottone. La manopola in plastica è inclusa con il meccanismo dimmer.
*Para cambiar el botón giratorio de plástico por el botón giratorio de latón, basta con sustituir el de plástico colocando el de latón. El botón de plástico está incluído con el mecanismo del regulador de luz.
*Für den Wechsel von Kunststoff Drehgriff für Messingdrehgriff, müssen Sie nur Kunstoffdrehgriff mit einem anderen Messingtyp ersetzen. Kunststoffgriff ist beim Dimmer Mechanismus inbegriffen.

FD-LD100, FD-LD220 and FD-LD440
Universal push dimmers FD-LD100, FD-LD220 and FD-LD440

Universal LED-dimmers for wallbox installation that starts at 1W
A common problem - when dimming LED lamps and CFL lamps - is that conventional dimmers usually require a high minimum load of 50W, 35W or 20W, while low energy light lamps and LED lamps have a power range from 1W up to 20W. For dimming of these low energy lamps dimmers that can operate from 1W and up are required. The series of universal push dimmers starts already at 1W for dimming of both lowpower lamps as well as electronic transformers, dimmable LED-drivers and incandescent lamps.

Adjustable minimum dimming level
Depending on the type of load that is connected to the dimmer, the dimmer's lowest dimming level can be adjusted to fit the load in question. The dimming characteristic is distinguished between different types of loads. This feature is perfect for use when there is mixed loads of different lamptypes including dimmable halogen and incandescent lights. It is also very handy if the user at some future date decides to switch from incandescent to 230 VAC dimmable LEDs. Then you need only adjust the lowest dimming level to the new load, instead of buying a new dimmer.

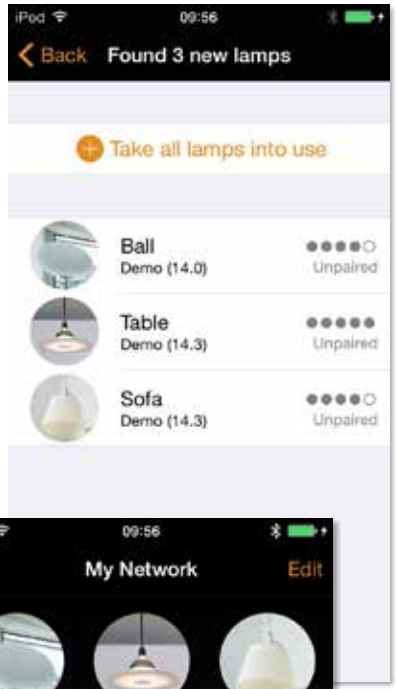
Memory function
Equipped with memory function that also remains after power failure.

App: Dimmers for Push Buttons

First time use

Casambi app is easy to use. Follow these simple steps.

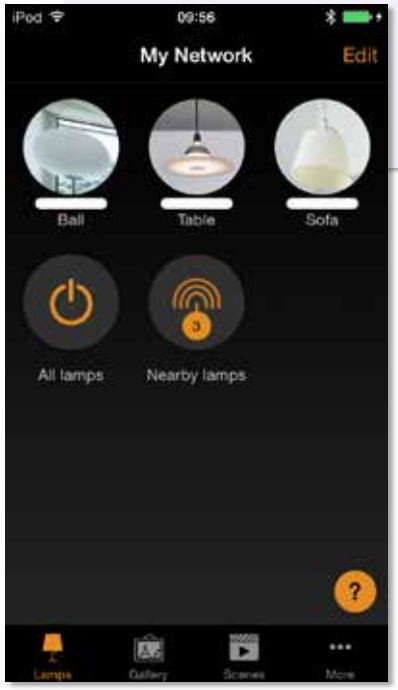
1. Download the app from Apple App Store or Google Play Store.
2. Turn on your Casambi enabled luminaires.
3. Open the app.
4. Casambi app will automatically find all Casambi enabled luminaires that are switched on.
5. Tap on the "Take all lamps into use".
6. Casambi app will automatically add all luminaires to one network and open the "Lamp" tab.

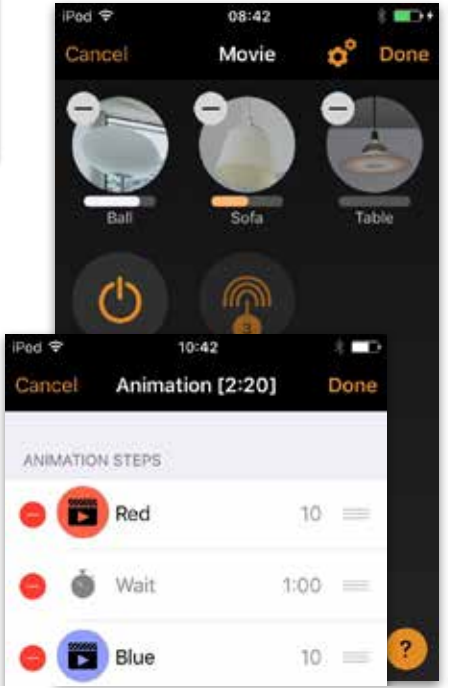


Scenes and animations

In the "Scenes" tab you can create different lightings for different occasions. It is possible to control multiple luminaires with one tap to create perfect ambience. One luminaire can be used in several scenes.

1. Tap on "Add a scene" and enter a name for the scene. Select the "Add a scene" option.
2. Select one or multiple lamp controls and adjust the luminaires for the scene. You can adjust the luminaires separately or if you want to have same dim level or colour for all you can use the "Lamps in scene" control to adjust all luminaires in the scene.
3. When you are done editing the scene tap on "Done".
4. If you would like to create more scenes tap on the "Edit" on top right corner and then tap on the "+" sign.





Basic gestures

Here are the basic gestures how to control your lights.

- To turn off or on your luminaire just tap on the lamp control.
- Pan lamp control left or right to adjust light level of the luminaire.
- Pan lamp control up or down to adjust the colour temperature of the luminaire.
- Hold on top of the lamp control to change the colour and save colours to palette.

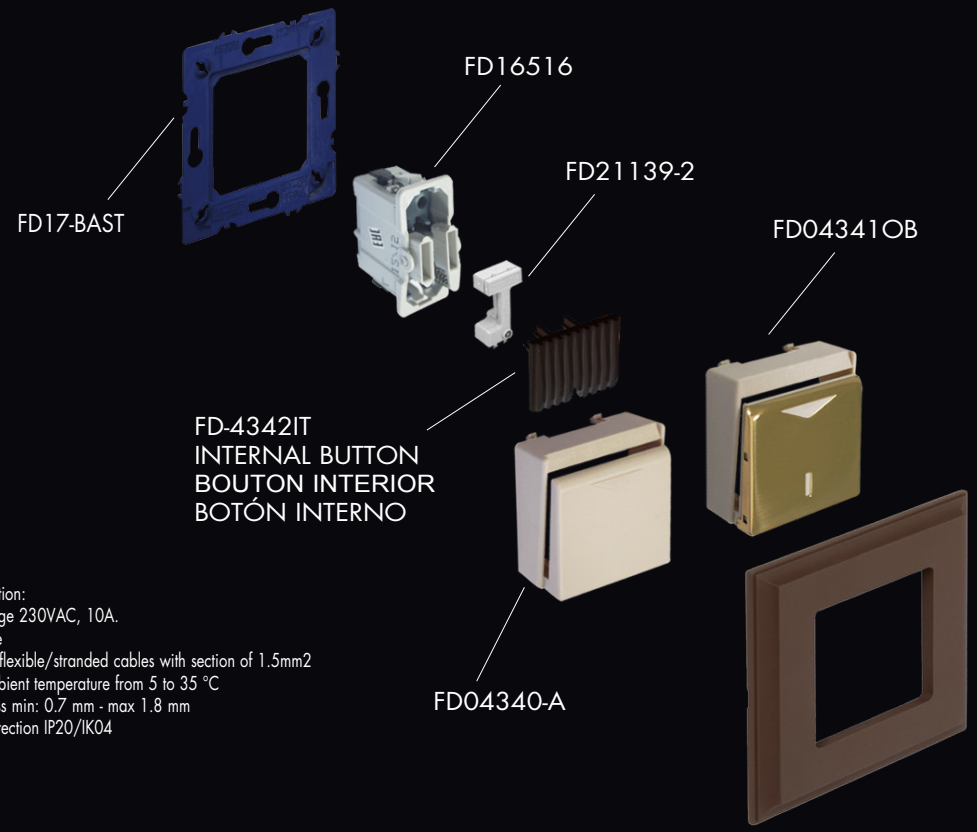
New Card Switch

Our new hotel carrd mechanism offers a refined look thanks to it´s exclusive brass coating. Exquisite finishes for those lovers of unique details that benefit from the latest technology in LED signalling and a maximum to accept cards of different sizes, ranging from 0.7mm to 1.8mm. It supports all frames of the FEDE collections and is installed in a standard European box (60mm), just as the rest of mechanisms shown in this catalogue.z

New Hotel Card Switch



Products description:
- Nominal voltage 230VAC, 10A.
- LED color- Blue
- Cables: rigid/flexible/stranded cables with section of 1.5mm2
- Operating ambient temperature from 5 to 35 °C
- Cards thickness min: 0.7 mm - max 1.8 mm
- Degree of protection IP20/IK04

FD1234AD

In-Wall Bluetooth Audio receiver that can be paired with any device with Bluetooth® capabilities (A2DP / AVRCP). Fits into the most popular light switches in the market (45 x 45mm).
Signal reach is 10/12 meters.
Designed to ensure security and avoid interferences from other users nearby, each Module has its own identification number.
Perfect for your home, ideal solution for hotel rooms, hospitals, schools and any public place… in the wall avoids theft.
The In-Wall Bluetooth kit, includes:

- In-Wall Bluetooth Audio Receiver
- Two 2 ½" 8Ω loudspeakers
- Power supply (15Vdc/0,8A)
- Control unit frame

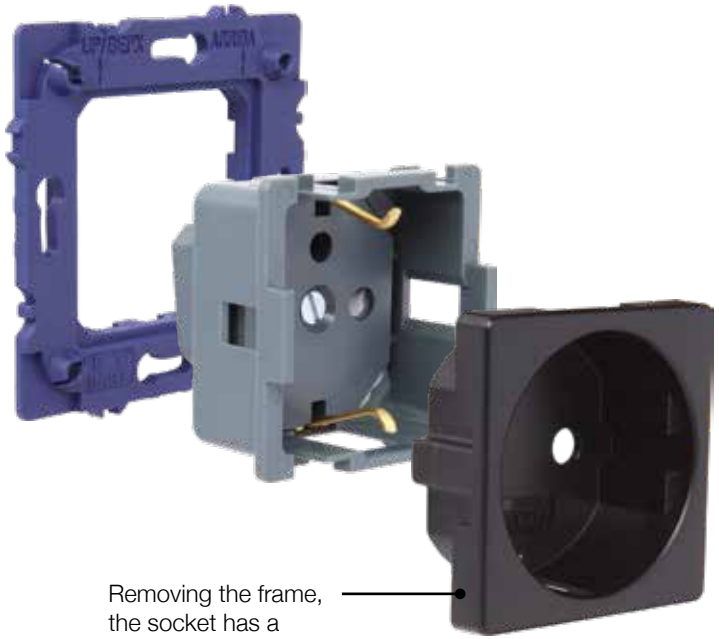
Instalation
Two 4Ω speakers can be connected, up to four 8Ω speakers and up to eight 16Ω speakers.
Maximum power 5 + 5W.

Features
Each module is identified as KINGBT-XXXX where XXXX is a serial number which permits the user to identify different Modules that can co-exist in the same installation.

The module is provided with a key for operating the Bluetooth® mode (ON/OFF).

External audio input: the module is also provided with a socket to connect a 3,5mm jack for an external audio input. When the user inserts the jack the audio output switches to the signal from the jack and has priority over the Bluetooth® signal.

German Socket



Removing the frame, the socket has a protection degree of IP21.

FD220F		Passageway OUT SAT isolated OUT TV isolated	3 dB 6 dB 10 dB 14 dB	TV / SAT networks with a "cascade" connection

Notes: DC-diode set between OUT and IN. For more information on connection diagrams, see page 71.

COMPACT OUTLET SERIES / PRISES SERIE COMPACT / TOMAS SERIE COMPACT

FD090F

Aluminum alloy support
for fixing connectors

FD091F

F-F connector

FD092F

F-IEC-pin connector

The FD090F support is made of an aluminum alloy with a high shielding ability and, depending on your needs, allows mounting one or two FD091F or FD092F connectors. This kit is installed in the circuit boards. Despite the fact that ecoCOMPACT is the most economical solution, it has a very wide operating range from 4 to 235 MHz and provides compatibility with analog and digital TV / SAT signals.

FEDE+ presents a new product line of brass covers for Multimedia sockets. Our new decorative covers provide a luxury finish to Multimedia outlets thanks to their excellent quality.

Thermostat with Metal Cover

FEDE+ presents a wide range of electronic devices to provide you with a more comfortable lifestyle. Thermostats for air temperature control, under floor heating and new multi-function thermostat.

*ITEMS' REAL SIZE ARE SHOWN IN THE IMAGES

For those who prefer original finishes made in brass in perfect combination with our covers, FEDE has developed a new version of our technologically advanced electronic thermostats.

Thermostat for electrical heating floors control 16A 230V ± 10%, 50/60 Hz.
Temperature control range: 5-45°C
Cable 4m with sensor for electrical heating floors included in package
Thermostat pour le contrôle électrique des planchers chauffants 16A 230V 10%, 50/60 Hz. Plage de contrôle de la température: 5-45°C
Câble 4m avec capteur pour contrôle électrique des planchers chauffants inclu dans le prix
Termostato per controllo di riscaldamento di pavimenti 16A 230V ± 10%, 50/60 Hz. Gamma di temperature: 5-45°C

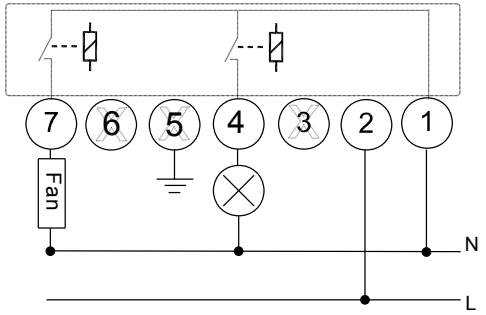
Bathroom light switch
FD28603

Includes both lighting and ventilation. When leaving the room, depending on the option of using the bathroom, the user presses the key with the corresponding symbol and the lighting goes out, while the ventilation continues to operate for a predetermined time. There is also the possibility to turn the fan on / off manually. The current setting and the operating mode are displayed on the LCD.



Infrared light switch
FD28604

The presence detector switch allows devices to be activated automatically when a person is approaching (for example, lighting). To optimize the characteristics you can adjust the level of illumination, with which the device will be activated, as well as the duration of its operation. In addition, on the front of the device is a switch, which allows to force its activation or deactivation manually.

THERMOSTAT CONNECTION DIAGRAMS

Thermostats FD18000/FD18001

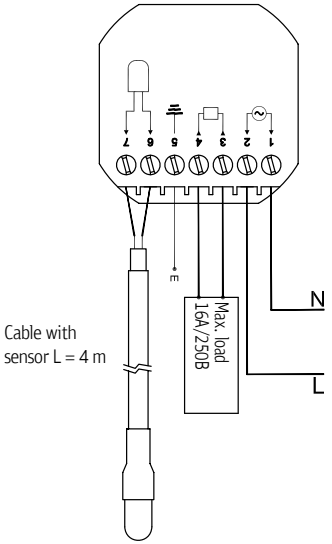
Decrease temperature

Increase temperature

Information

This thermostat provides simple and intuitive temperature management, whose current settings are displayed on a large LCD. Thanks to the built-in RGB, the thermostat display changes color according to the operating mode: when the heating mode is activated, the display will light blue. The set temperature and the actual temperature are shown alternately on the display; pressing the "DISPLAY" button will only display the actual temperature, and pressing the button again will re-activate the information collation mode.

There are two versions of thermostat available:
FD18000 — to control the floor temperature.
FD18001 — to control the room air temperature.



Cable with sensor L = 4 m

Multifunctional thermostat FD18004

Comfort mode

Night mode

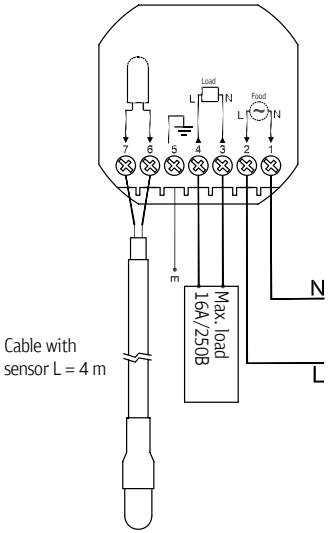
Increase temperature

Decrease temperature

Power on / off

This thermostat allows the previous programming of two modes of operation: economic and comfort. The modes are selected by clicking on corresponding buttons. The LCD displays the current thermostat setting.
This thermostat can operate in the following modes:

— floor temperature control.
— air temperature control.
(for example, when connecting electric radiators)
— combined mode



Cable with sensor L = 4 m

MECHANISM CONNECTION DIAGRAMS FOR POWER TV SOCKET OUTLETS

There are two types of television signal wiring for several users: the parallel circuit ("star" wiring) and the series circuit.

In the first case the dividers, also called separators, are used, which are responsible for equitably dividing the power of the input signal into 2, 3 and 4; although it should be noted that for each division in 2 the power of the signal for each output also decreases by half (actually even a little more: the signal drop is usually 3.5-4.5 dB) . This method of wiring provides a great uniformity of power in the television frequency band and a great insulation between the terminals, however, it requires more cables.

In the second case the couplers are used and the television channels are connected in series (cascade) one after another. This type of wiring offers unequal division of the signal. Such a wiring method provides uneven division of the signal, is easier to implement and requires fewer cables. However, when this scheme is implemented the signal reaches a lower number of TV receivers.
